# WORKPLACE HAZARDOUS MATERIALS INFORMATION SYSTEM (WHMIS) CERTIFICATE

## EMPLOYER RESPONSIBILITIES

### Ensure the training received is satisfactory:

It is the employer's responsibility to ensure each employee who works with or in close proximity to controlled products be trained to their satisfaction. The Worksite Safety Compliance Centre WHMIS training program provides training on the subjects listed on your certificate below. The employer is required to train employees about the hazards, safe handling and emergency procedures for the hazardous materials in the workplace.

### Include additional training details and sign the certificate:

The employer is not legally required to issue a certificate to their employees but if you do provide a certificate you may fill in the details on the certificate below. Regulations do not specify an expiration on WHMIS training received and as such, the expiry field is optional. There are sections for the employer and the employee to sign. Include additional WHMIS-related training details on the back of the certificate below.

### Maintain a record of training:

In the event that your WHMIS training history comes under scrutiny by government inspectors, it would be a good idea to maintain a separate record of WHMIS training. This record should include the date, course contents and student information. A signed photocopy of this page should be sufficient.

Details of Training  
Material Safety Data Sheets (MSDS)  
Emergency Procedures  
Workplace / Supplier Labels  
Pipemarking

Legislation  
Safe Storage  
WHMIS Symbols and Hazard Classes A,B,C,D,E, & F  
Employer / Worker / Supplier Responsibilities  
Exemptions
